

AVerVision CP150

Portable Document Camera

 folded view

Product Description

The AVerVision CP150 features the new flexible neck look designed with an abundance of features in a highly portable solution. The industry leading 3.2 mega pixel sensor provides unmatched image clarity while the total 16 times zoom and pan allows users clearly view the smallest details and text. Exclusive presentation features are also provided with the AVerVision CP300 including AVerBox and AVerVisor. Total 16 times zoom comprised of 2 times AVerZoom and 8 times Digital zoom, even the smallest objects and text are clearly viewable. The included software allows users to save both images and

video and audio to their PC or MAC, or up to 80 images can be saved directly to the AVerVision CP150 internal memory. A full function 360 degree access remote control is included, and an optional microscope adaptors allow virtually any microscope to be connected to the AVerVision CP150 to show the smallest microscopic detail on a large screen

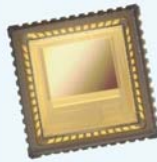

Feature Highlights

network sharing and annotation software

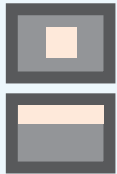

included enhanced annotation features with the ability to share live presentations over a local area network

3.2 mega pixel

unrivaled image clarity with a crystal clear 3.2 mega pixel image sensor, produces up to XGA 1024 x 768 resolution

AVer Box & AVer Visor

exclusive presentation features designed to enhance important details

built-in flip over LED light

compact flip light equalizes lighting and reduces shadows

Product Specifications and Package Content

image sensor	1/2" CMOS color sensor	network sharing	yes, with AVerVision software
pixel count	3.2 mega pixel	light	yes
maximum output resolution	1024 x 768 XGA	base light	optional
total zoom	16x	picture-in-picture	n/a
